To: "Mendenhall, David N" <dnmendenhall@longfibre.com>

Hi Dave, on the cover of our Stormwater permit it states the expiration date as September 20, 2007. And in section S2 G. it says that we "must reapply for coverage by submitting the Application for Renewal of Coverage at least 180 days before the specified expiration date of this permit". So that puts our reapply date at February of 2007, unless I'm missing something. Also I have two quotes to update our SWPPP but last we spoke you were working on getting someone in LV to write the plan, the way "we" wanted them to. If this has changed you can take another look at the quotes, or I'll just move forward with the one I feel is the best. I'll attach the one I have electronically, the other is from Shaw Environmental Inc., its total cost is \$1776 and its pretty bare bones I don't think it would pass next year. I can send you a copy if you like. Dave thanks for your help, Mike A.
